ICAC statement

2017-5-24

In view of immense public concern arising from a press release titled “ICAC arrests 21 for alleged corruption over false concrete tests” issued yesterday (May 23), as well as public interest involved, the ICAC today (May 24) issues the following statement to avoid unnecessary speculations:

“According to ICAC investigation, the malpractice mentioned in the press release concerned only the contractor of the Civil Engineering and Development Department (CEDD) and its staff members. There is no information or evidence to suggest that any public officers, contractors or material suppliers (or their personnel), other than the CEDD contractor and its staff members, were involved in the above malpractice.”
